

Zeyad Waled

Software Engineering Student — Full-Stack, Systems & Automation

Cairo, Egypt · +20 112 555 5010 · ziadwaled4@gmail.com · zeyad-101.github.io · github.com/Zeyad-101 · in/zeyad-waled-0100z001

EDUCATION

B.Eng. Software Engineering — Egyptian Chinese University (ECU), Cairo Expected Jun 2029
GPA 3.4 / 4.0 · Coursework: Data Structures, OOP, Operating Systems, Computer Networks, Digital Logic

EXPERIENCE

Software Engineer Intern — SYNK (Remote) Aug 2026 – Sep 2026

- Built frontend features for Synk, a browser-based virtual events platform, in React and JavaScript.
- Ran automated and manual tests across devices to catch reliability issues before release.

Software Automation Specialist — Spinners Creative Agency, Dubai (Remote) Jul 2024 – Jul 2025

- Built 5 AI-assisted data pipelines (n8n, Power Automate, Google Sheets, Lemlist API), saving 3+ hours/week of manual work across international client accounts.
- Wrote Python validation and reporting scripts that cut client onboarding from 2 hours to 20 minutes.
- Won 6 international clients from a 100+ prospect pipeline by diagnosing their automation gaps (~6% conversion vs. ~2% industry average).

PROJECTS

ZED — Local-first AI agent runtime · Python, Ollama, SQLite, PySide6, pytest github.com/Zeyad-101/ZED

- Built an agent loop that chooses a tool, runs it in a sandboxed workspace and feeds the result back to a local LLM via Ollama — no cloud API keys.
- Put a risk-tiered permission gate in front of every tool call with an audit log of each decision; added a job scheduler and SQLite-backed vector memory.
- Grew it over 19 incremental phases with 500+ pytest tests guarding each phase's behavior.

Keypeer — Password manager browser extension · TypeScript, React, Vite, Web Crypto, github.com/Zeyad-101/Keypeer
Chrome MV3

- Encrypts each vault entry with AES-256-GCM under an Argon2id-derived key held only in background-worker memory and wiped on idle auto-lock.
- Content scripts detect login forms for one-click autofill and save prompts; zero backend, zero network calls; crypto and storage unit-tested with Vitest.

JobOps — Open-source contributor · TypeScript, Node.js, Cheerio, Docker 4 merged PRs

- Built the WUZZUF and Khamsat job-board extractors (Cheerio parsing, unit-tested parser and runner) for a self-hosted job-search platform with 800+ users (#3 GitHub Trending, TypeScript); wired both into the Docker build and extractor health checks.

Git-Pulse — GitHub profile analyzer · Next.js 16, React 19, TypeScript, Groq API live demo

- Turns any GitHub username into a game-style card — XP, class, rank, 8 achievements — scored by pure, unit-tested functions over the GitHub REST API, with an LLM roast (deterministic fallback) and client-side PNG export.

TrackWatch — ESP32 health monitor · C/C++, Embedded C, I2C, OneWire GitHub

- Read MAX30102, MPU-6050 and DS18B20 sensors at ~100 ms polling with ±2 BPM accuracy vs. a clinical oximeter; firmware passed 8-hour stress runs with no crashes or sensor dropouts.

More: Hospital Management System (C++/Qt6, led a 7-person team) · Gahez (AI interview coach, live) · Khatak (Cairo Metro planner, live) · SkillSwap (React + Supabase realtime) — zeyad-101.github.io

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, C, SQL, HTML/CSS

Frameworks: React, Next.js, Node.js, Vite, Tailwind CSS, Qt6, PySide6

Data & backend: REST APIs, Supabase (Postgres, Auth, Realtime), SQLite, LLM APIs (Ollama, Groq)

Testing & tooling: Vitest, pytest, Git/GitHub, Docker, Linux, Chrome Extensions (MV3)

Embedded & automation: ESP32, Arduino, I2C, OneWire, n8n, Power Automate

LEADERSHIP & ACHIEVEMENTS

- Vice Head of HR, IEEE ECU Student Branch** (Jun 2025 – present) — built an automated candidate-scoring sheet for 150+ applicant interviews; trained 50+ committee members; led the branch's largest event (75+ attendees per session).
- National Finalist, DIGITOPIA 2025** (Ministry of Communications, Egypt) — Unity VR app digitizing Egyptian antiquities; reached the national finals from 25,000+ applicants.
- Head of the Season** (2025/26) and **Member of the Season** (2024/25), IEEE ECU Student Branch.
- Certifications:** Claude Code 101 & Claude 101 — Anthropic · Introduction to Cybersecurity — Cisco · Network Security & Network Fundamentals — ITI · ICIP — OPSWAT · Forward Program — McKinsey.org
- Languages:** Arabic (native), English (upper-intermediate, B2+)
