EDUCATION

B.Eng. Software Engineering — Egyptian Chinese University (ECU)

Expected Jun 2029

GPA: 3.4 / 4.0 | Coursework: Data Structures, OOP, Digital Logic, Computer Networks, Operating Systems

TECHNICAL SKILLS

Languages: C++, C, Embedded C, SQL, TypeScript, JavaScript, HTML, CSS, Python

Embedded & IoT: ESP32, Arduino, Proteus | Protocols: I2C, OneWire, TCP/IP | Security: Wireshark, Zenmap

Automation & DevOps: n8n, Microsoft Power Automate, Git/GitHub, Linux, Docker | Tools: VS Code, Figma, Canva

WORK EXPERIENCE

Software Automation Specialist — Spinners Creative Agency

Jul 2024 – Jul 2025

Dubai, UAE (Remote)

- Engineered 5 AI-powered pipelines (n8n, Power Automate, Google Sheets, Lemlist) — cut 3+ hrs/week of manual data management across international client accounts
- Closed 6 international clients from a 100+ prospect pipeline by diagnosing automation gaps — ~6% conversion vs. ~2% industry average (3× benchmark)

LEADERSHIP & VOLUNTEERING

Vice Head of HR — IEEE ECU Student Branch

Jun 2025 – Present

Cairo, Egypt

- Built an automated candidate-scoring pipeline in Google Sheets, processing 150+ applicant interviews at ~40% acceptance rate across committee selections
- Trained 50+ committee members on structured recruitment frameworks; led the branch's largest event with 75+ attendees per session

ACHIEVEMENTS

- National Finalist, DIGITOPIA (Ministry of Communications, Egypt, Nov 2025) — built a Unity VR app digitizing Egyptian antiquities; advanced to national finals out of 25,000+ applicants
- Member of the Season — IEEE ECU Student Branch; awarded for outstanding contribution to branch initiatives and community impact

PROJECTS

JobOps (Open Source) | TypeScript, Node.js, Cheerio, Docker

[GitHub](#)

- Contributed 4 merged PRs to a self-hosted job-tracking monorepo (800+ users, top-3 trending on GitHub); built WUZZUF & Khamsat scrapers via Cheerio plugin pattern; fixed CI failures and Docker config issues — ranked #7 on contributor leaderboard

TrackWatch | C/C++, Embedded C, I2C, OneWire, ESP32

[GitHub](#)

- Architected ESP32 health monitor (MAX30102, MPU-6050, DS18B20) at ~100ms polling — ±2 BPM accuracy validated against a clinical oximeter; firmware ran 8-hr stress tests crash-free with zero memory faults or sensor dropouts

Hospital Management System | C++, Qt6, OOP

[GitHub](#)

- Led 7-member team delivering a desktop hospital app (registration, scheduling, records, billing) — full GUI from Figma to Qt6 with sub-200ms UI response across all CRUD operations

CERTIFICATIONS

Claude 101 — Anthropic (May 2026) | Introduction to Cybersecurity — Cisco (Apr 2026) | Network Security & Fundamentals — ITI (Mar 2026) | ICIP — OPSWAT (Feb 2026) | IoT & AI Overview — Huawei ICT (Aug 2025)

LANGUAGES

Arabic (Native) | English (B2+ / Upper-Intermediate)
